

Automatically convert documents to PDF or TIFF formats

ILINX® Capture Format Converter enables the conversion of files from almost any format to single or multi-page PDF or TIFF documents. Improve security by keeping documents safe from unwanted modification by unifying documents from native formats to one or two common, secure document types. Efficiencies will be significantly improved by unifying documents to one or two easily digestible formats, removing barriers to readability.

Benefits & Features

Flexible & Simple to Implement

- › Requires no programming
- › Easily integrate this tool in your workflow process
- › Can be configured to run continuously with little or no user interaction

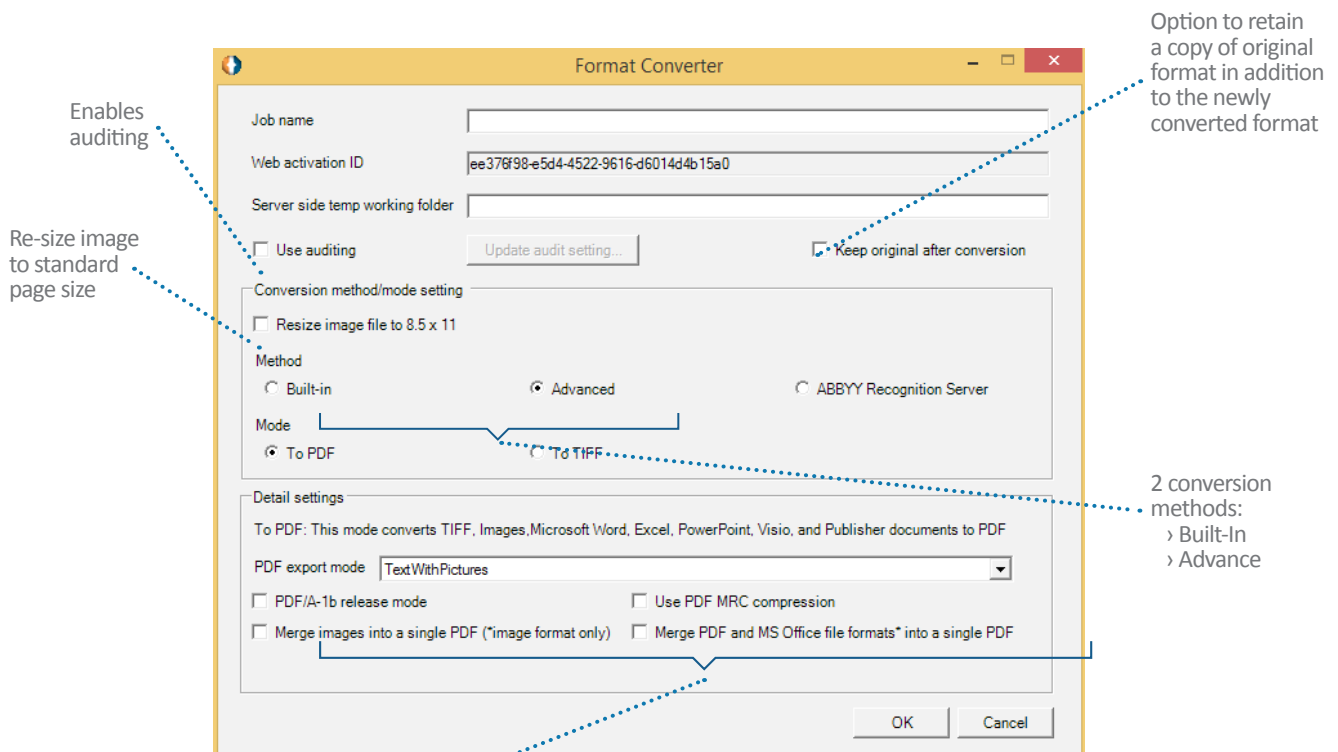

Optional Methods for Conversion

Built-in Method

- › Users have the ability to convert and merge most common image formats, PDF, PDF/A, and MS Office documents to PDF or TIFF format
- › Selecting TIFF mode will allow users to export to most common TIFF formats and resolutions

Advanced Method

- › Adds full text searchable PDFs and a more extensive selection of TIFF formats

- 4 format options:
- › Standard PDF
 - › Full-text searchable PDF's
 - › Archive PDF/A
 - › TIFF
